DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Abstract, line 2, replace "comprises" with -includes-.

Allowable Subject Matter

Claims 1-14 and 16-19 are allowed.

Claims 1-14 and 16-19 are allowable over the prior art of record, none of the prior art whether together singularly or in combination to teach the claimed combination as recited. The closest references 'Fractured Reservoir Characterization and Performance Forecasting Using Geomechanics and Artificial Intelligence' by Ouenes et al. and 'Improved Fractured Reservoir Characterization Using Neural Networks, Geomechanics and 3-D Seismic' by Zellou et al. do not disclose or suggest the improvement of the instant application comprises the steps of obtaining and combining seismic traces into gathers that reveal acoustic reflectivity as a function of offset, azimuth, and position (AVAZ), measuring reflection anisotropy as a function of position, determining a relationship between reflection anisotropy and fracture intensity measurements of four month cumulative fluid production at specific positions and applying the relationship to reflection anisotropy measurements to create a set of fracture intensity measurements using multiple regression.

Ouenes et al. and Zellou et al. teach obtaining 3-D seismic travel time and 3-D average amplitude instead of using AVAZ to determining a relationship between reflection anisotropy and fracture intensity measurements at specific positions and applying the relationship to reflection anisotropy measurements to create/map a set of fracture intensity measurements.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
